One Year Service Contract

This service plan includes two clean and checks per year. A service technician will clean your air conditioner in the **SPRING**, and your furnace in the **FALL**.

The **SPRING** clean and check includes cleaning the air conditioner using Nu-Brite cleanser, and checking the major components of the cooling system: capacitor, contactor and freon level.

The **FALL** clean and check includes cleaning the furnace and checking the major components of the heating system: igniter, flame sensor, check gas valve with manometer and check the pressure switch for contact.

As a member of this service plan, if a problem arises and a technician needs to service either of the units, you receive higher priority over other service calls. You will also receive a 10% discount on any service call.

Additional charges apply for cleaning of humidifier, air cleaners, and filter replacement.
